Request for Approval to Perform Lacrimal Irrigation and Dilation Procedures

Business and Professions Code section 3041(e)(6) requires that California licensed optometrists must complete ten lacrimal irrigation and dilation procedures under the supervision of an ophthalmologist(s), as confirmed by the ophthalmologist, before the optometrist will be approved to independently perform the procedures. Optometrists wishing to obtain such approval must use this form to document qualifying experience.

Upon receipt of documentation of 10 qualifying procedures, the Board of Optometry will issue an Approval to Perform Lacrimal Irrigation and Dilation Procedures to the Optometrist.

This section is to be competed by the ophthalmologist(s) supervising the procedures.

I certify under penalty of perjury under the laws of the State of California that the California licensed optometrist listed herein has competed all or such portion of lacrimal irrigation and dilation procedure as is indicated below. I understand that any misstatements of material facts may be cause for the denial of the licensed optometrist's lacrimal irrigation and dilation procedure approval and cause for disciplinary action by the Board.

Name of Optometrist: _____ Optometrist License Number: _____

	Date of Procedure	Signature of Supervising Ophthalmologist	Name of Supervising Ophthalmologist
